What is claimed is:

1. A method for pricing a trade comprising:

providing a user input for entering trade data;

providing a structure for receiving said trade data;

5   transmitting said structure to a pricing system;

receiving said structure from said pricing system;

displaying said structure with said trade data including pricing information.

2. A method in accordance with claim 1 further comprising:

encrypting said structure before transmitting said structure to a pricing system.

10   3. A method in accordance with claim 1 further comprising:

decrypting said structure after receiving said structure from said pricing system.

4. A method in accordance with claim 1 wherein providing a user input for entering one or more trades comprises translating data representing one or more trades from a user treasury system into a form suitable for use in said structure.

15   5. A method in accordance with claim 1 wherein displaying said structure comprises translating data from said structure into data representing one or more trades in a user treasury system.

6. A method in accordance with claim 1 wherein providing a user input for entering trade data comprises providing a user input for entering trade data directly into said structure.

20   7. A method for pricing a trade comprising:

providing a user input for entering trade data into a structure at a user system;

transmitting said structure to a pricing system;

pricing said trade data at said pricing system;

adding said pricing data to said structure at said pricing system;

25   transmitting said structure to said user system;

displaying said trade data and said pricing data at said user system.

8. A method in accordance with claim 7 further comprising:

encrypting said structure at said user system before transmitting said structure to said pricing system.

30   9. A method in accordance with claim 8 further comprising:

decrypting said structure at said pricing system after receiving said structure from said user system.

10. A method in accordance with claim 7 further comprising:

encrypting said structure at said pricing system before transmitting said structure to said

5   user system.

11. A method in accordance with claim 10 further comprising:

decrypting said structure at said user system after receiving said structure from said pricing system.

12. A method in accordance with claim 7 wherein providing a user input for entering

10   trade data comprises translating data representing one or more trades from a user treasury system into a form suitable for use in said structure.

13. A method in accordance with claim 7 wherein displaying said structure comprises translating data from said structure into data representing one or more trades in a user treasury system.

15   14. A method in accordance with claim 7 further comprising:

storing said trade data at said pricing system.

15. A method in accordance with claim 14 further comprising:

executing one or more trades using said trade data stored at said pricing system.
